PROFILE

I consider myself a creative person, passionate about the new and the unknown, a person who loves challenges and is constantly challenged. I believe that you always learn from other people and/or situations that happen on a daily basis. I always try to share my acquired knowledge to solve the impediments that are presented to a colleague or the team.

Knowledge of cloud services through Azure, development of projects with Agile methodologies such as SCRUM. Programming systems with HTML, CSS, JavaScript, Java, Python, C#, NetFramework, NodeJS, JQuery, Git and OOP paradigm also relational and non-relational databases as MongoDb, MySQL, SQL.
